Summary

Dedicated IT professional with practical experience in full-stack development and an increasing interest in data science and business intelligence. Currently advancing my studies with a Master's in Business Intelligence, supported by strong skills in web development, data analytics, and agile practices. Highly motivated to deepen my knowledge in big data technologies and data-driven strategies while benefiting from international academic collaboration.

Experiences

Internship Trainee, Tunisie Telecom

January 2023 - February 2023

Observation of the professional environment and introduction to web development.
